

## MINISTRY OF TRANSPORTATION

Our transportation network is essential to Ontario's economic recovery and growth. Our economy relies on this system to remain competitive by moving people and goods throughout our province and across our borders safely and efficiently. Strategic investments in highways, roads, public transit, bridges and border crossings create jobs and the infrastructure necessary to attract new investment and strengthen our economy.

The Ministry of Transportation is committed to increasing transit ridership by working with our partners to make transit a convenient and accessible option for commuters. The Ministry is also working to advance an integrated multimodal transportation network to support the efficient movement of people and goods. Promoting road safety for all road users, through education, legislation, regulation and enforcement, in order to remain among the safest jurisdictions in North America remains a top priority. In addition, the Ministry is improving Ontario's highway, bridge and border infrastructure through strategic investments and integrating the principle of sustainability into programs, policies and operations.

## MINISTRY ADMINISTRATION PROGRAM - VOTE 2701

The Ministry Administration Program provides leadership and direction for ministry resources planning, management, controllership, procurement, customer service, accessibility planning, emergency management and other corporate functions.

Support is provided to program areas by the Finance, Communications, Facilities and Business Services, Strategic Human Resources, Internal Audit and Legal Services Branches. While Strategic Human Resources, Internal Audit and Legal Services retain their strategic leadership and dual reporting relationship with the Centre for Leadership/Human Resources Management, the Ministry of Finance and the Attorney General respectively, their costs are assumed by the Ministry of Transportation.

**POLICY AND PLANNING - VOTE 2702**

The Policy and Planning Program is responsible for identifying and achieving Ontario's long-term, strategic transportation interests. Its primary focus is to plan and promote an efficient and sustainable multimodal transportation system throughout the province.

In consultation with key federal and municipal partners, the program undertakes multimodal transportation policy development and long-range transportation planning to ensure that all of the elements of the system (air, rail, road, marine and transit) work together effectively.

The program provides funding to support a multimodal transportation system and to help achieve provincial transportation-related climate change objectives. It is responsible for managing the province's relationship with Crown Agencies accountable to the Minister of Transportation such as Metrolinx, which includes GO Transit.

Additionally, the division works to advance Ontario's transportation priorities and interests by working with the federal government and other provinces on key areas of common interest.

**ROAD USER SAFETY PROGRAM - VOTE 2703**

The Road User Safety Program develops and implements strategies to improve road safety and mobility through education, enforcement and regulation of safe driving behaviour and motor vehicle safety.

Ontario holds a leading position as one of the safest jurisdictions in North America. Ministry of Transportation's road safety program leads and actively participates with other jurisdictions in Canada and the United States in developing and promoting road safety programs and best practices. The program works with many partners including police, community groups, safety organizations and the private sector to reduce fatalities and injuries on our roads.

The key responsibilities of the program are to: set safety standards and develop policies, programs, legislation and regulations for road users, carriers and vehicles; inspect, monitor and enforce compliance with those standards; manage and deliver commercial vehicle programs. It also supports the delivery of programs for other ministries, for example Drive Clean (Ministry of the Environment).

The program also oversees the delivery of services provided by our partners. The program establishes policies and standards in relation to driver and vehicle licensing and registration and other services delivered by our governments and private sector partners.

**PROVINCIAL HIGHWAYS MANAGEMENT PROGRAM - VOTE 2704**

This program oversees the planning, design, construction, maintenance and operation of the provincial highway network and develops strategies to maximize investment results in highway infrastructure.

The program manages activities to deliver a provincial highway network that is safe, provides mobility for people and goods, and promotes economic, environmental and social sustainability. The program delivers these activities through the use of internal resources and a variety of partnerships and private sector service providers.

Sound investment strategies preserve existing highway infrastructure through the application of asset management principles, improve trade corridors leading to key international border crossings, including the Windsor Gateway, and integrate highways with other modes of transportation.

Activities include environmental assessments, investment planning, engineering, property acquisition, rehabilitation, new construction, contract oversight, routine summer and winter maintenance (such as shoulder grading/snow and ice control) for all provincial highways and bridges. In addition to the highway network, the program is responsible for remote airports throughout northern Ontario, ferry services in locations across Ontario, first nations roads subsidies, delivering road improvements in unincorporated areas, service centres, and the production of the official map of Ontario highways.

The program also develops policies and guidelines and sets highway and bridge maintenance, engineering, material, investment planning and construction standards.

**ECONOMICS AND TRANSPORTATION CLUSTER PROGRAM - VOTE 2705**

The Economics and Transportation Cluster provides leadership in the use of information technology for the Ministries of Economic Development and Trade, Labour, Research and Innovation, Consumer Services and Transportation.

Through effective management of information and information technology resources, the Cluster enables the ministries to deliver on elements of their Results-based Plans. The Cluster also plans the ministries' information and information technology investments and delivers quality service while continually measuring and improving its performance. To enhance program delivery, enable new business opportunities and ensure improved customer service, the Cluster works to modernize the ministries' information practices, systems and applications.
