

MINISTRY OF TRANSPORTATION

SUMMARY

Transportation is a cornerstone of economic prosperity and a strengthened quality of life. Much of what we value, our jobs, our health, our education and our leisure time, are affected by the quality and availability of transportation. Similarly, Ontario's export-driven economy relies upon this same system to move goods and people efficiently and competitively, particularly in the current climate of just-in-time delivery.

The Ministry of Transportation supports strong communities that offer a high quality of life and a positive business climate by building and maintaining a safe, balanced and integrated transportation network within Ontario. Consequently, the ministry is pursuing ways to make public transit a viable alternative by promoting increased convenience, flexibility and accessibility. In addition, the ministry is working to ensure that Ontario's transportation infrastructure is maintained regularly, repaired when necessary and strategically expanded in order to protect public investments and that this is carried out in an environmentally responsible manner.

The ministry is also pursuing new and innovative technologies to ensure that our programs and services meet people's needs and that transportation continues to support job creation, tourism, business investment, trade and a high quality of life for Ontarians into the 21st century.

MINISTRY OF TRANSPORTATION

MINISTRY ADMINISTRATION PROGRAM :

The program provides business and resource planning, management advice and direct services to enable the Ministry of Transportation to deliver its priority transportation initiatives. This is achieved through the provision of expert leadership, advice and services to plan, develop, acquire, allocate and manage the ministry's facilities and finances. This program also provides strategic internal and external communications services and products that support, promote and educate the public on Ministry of Transportation programs. Internal Audit, Human Resources and Legal Services are also provided through this program area.

The program works in partnership with central agencies and other ministries as well as employee and private sector organizations, to ensure that the interests of the ministry are met in the development of government-wide management objectives.

MINISTRY OF TRANSPORTATION

TRANSPORTATION POLICY AND PLANNING PROGRAM :

The primary focus of the Transportation Policy and Planning program is to plan and promote a safe, efficient and reliable multi-modal transportation system, including transit that supports strong communities, an enhanced quality of life and a healthy economy. To achieve this, the program provides leadership in setting strategic policy direction for the ministry as part of its integrated long-term planning, and works to enable a supportive policy and regulatory environment.

In addition, this program focuses on easing traffic congestion through the promotion of public transit, and facilitating the movement of people and goods along our highways and at our border crossings. It also manages the ministry's inter-provincial and bilateral negotiations with the federal government on a range of transportation related issues including the implementation of various federal investment programs.

MINISTRY OF TRANSPORTATION

ROAD USER SAFETY PROGRAM :

The Road User Safety Program leads key ministry road safety strategies of improving road safety and mobility, by the education, enforcement and regulation of safe driving behaviour, promoting vehicle safety and by improving customer service. Our key objective is to reduce fatalities and injuries on our roads by developing, promoting and participating in road user safety programs. The Road User Safety Program continues to work with many partners including police, community groups, safety organizations and the private sector to continuously improve road user safety.

The key safety responsibilities of the program are to: set safety standards, develop and evaluate policies, programs and regulations for road users, carriers and vehicles; inspect, monitor and enforce compliance with those standards; licence drivers and vehicles; manage contracts and ongoing relationships with service providers; and work with a broad range of partners to educate road users about safe driving behaviour and road user safety polices, laws and programs. Developments in other jurisdictions and traffic safety research are monitored so that road safety initiatives are effective in maintaining Ontario's leading position as one of the safest jurisdictions in North America.

The program is also responsible for managing and improving customer service by setting standards and monitoring performance of service delivery, including the delivery of government products and services through electronic means for individuals and for the business sector and facilitating the delivery of programs for other ministries (e.g., Drive Clean [Ministry of Environment], Family Support Payments [Ministry of Community and Social Services]).

Ministry of Transportation collects information from individuals under the authority of the *Highway Traffic Act*. The ministry maintains stewardship of this information and protects individuals' privacy in keeping with *Freedom of Information and Protection of Privacy Act*.

PROVINCIAL HIGHWAYS MANAGEMENT PROGRAM :

This program oversees the maintenance and operation of the provincial highway network and invests strategically in highway infrastructure to support the development of safe and strong communities in Ontario.

The program manages activities to preserve public investment in existing infrastructure and improve the movement of people and goods on Ontario's highways. Investment strategies include a focus on improving trade corridors leading to key international border crossings and integrating highways with public transportation.

Activities include routine highway maintenance; winter snow and ice control; highway planning, engineering and detailed design; highway rehabilitation; new construction and construction administration.

The program also develops operational policies and guidelines, sets highway maintenance and construction standards, manages research and develops new technologies. In addition to the highway network, the program is responsible for remote airports in northern Ontario and ferry services in various locations across Ontario.

MINISTRY OF TRANSPORTATION

TRANSPORTATION INFORMATION AND INFORMATION TECHNOLOGY CLUSTER PROGRAM :

The Transportation Information and Information Technology Cluster (the Cluster) provides leadership in the use and deployment of information technology for the Ministry of Transportation, and enables the ministry's core businesses to deliver on elements of the Results-based Plan through effective management of the information and information technology resources. The Cluster focuses on planning Ministry of Transportation's information and information technology investments and delivering quality service to clients while continually measuring and improving its performance. To enhance program delivery, enable new business, and ensure improved customer service through e-Government, the Cluster continues to modernize the ministry's systems and platforms. Ministry of Transportation's information and information systems benefit internal Ministry of Transportation clients as well as external stakeholders such as other ministries and private sector partners (delivered through Ministry of Transportation's core businesses). As such, the Cluster manages the ministry's information and information systems as major business assets.
